Allowable Subject Matter

1. This Office Action is responsive to the Amendment filed 04/13/04.

2. Claims 1-45 are allowed.

The Examiner has carefully considered the independent claims 1, 16, and 31. The "system," "method," and "article for manufacture" for "generating a status page to display" as claimed was not taught or suggested by the prior art. Generating status page or progress bar is known in the art as taught Bardmesser and Lavey Jr. Bardmesser teaches a status bar (Fig. 5) that indicates the percentage of used storage space. Lavey Jr. teaches a status bar that that indicates the status of downloading data operation. However, neither Bardmesser nor Lavey Jr. teaches "determining an operation being performed with respect to the resource, wherein the operation is one of a management operation for the resource," "determining an attribute of the operation, wherein the determined attribute indicates a reason the operation is being performed," and "generating data to display information with one of the first part or second part of the progress bar indicating the determined attribute of the operation, wherein data to display information indicating the determined attribute of the operation indicates a reason the operation is being performed and wherein the data to display the progress bar indicates a percent of the operation that has completed and a percent of the operation that has not completed" in a specific combination as recited in claims 1, 16. and 31. These limitations define patentably over relevant prior art made of record.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on
